

# MEDICAL AID CAMPAIGN

---

## SUMMER 2026

**Beneficiaries:**

Hospitals, clinics, medical facilities

**Aid:**

Replaced damaged equipment; medical supplies; specialized medical equipment

**HUMANITARIAN & MEDICAL AID**

PARTNER ORGANIZATIONS

AICM    HELP E+    ISKRA DOBRA

HOSPITALS DIRECT BENEFICIARIES

DNIPRO    ZHYTOMYR    VOLYN    KYIV

**ASSISTANCE FOR VULNERABLE POPULATIONS**

PARTNER ORGANIZATIONS

DOBRO    CENTER FOR ORPHAN CARE    CENTER FOR STUDENT CHAPLAINS

INDIVIDUALS DIRECT BENEFICIARIES

**UNWLA BABUSI FUND**

**Beneficiaries:**

Orphans, foster children, students, refugee children, elderly women

**Aid:**

Recreational retreats and educational camps, targeted financial support.

**Beneficiaries:**

Women serving in the armed forces of Ukraine

**Aid:**

Tailored seasonal uniforms, boots, clothing, (non-military garments)

**WOMEN ON THE FRONTLINES**

PARTNER ORGANIZATION

3ML  
CHK  
Ukrainian Front

**MENTAL HEALTH**

PARTNER ORGANIZATIONS

uamentalhelp

Spiv Diia

**Beneficiaries:**

Children and women

**Aid:**

Psychological support programs in individual and group setting

# HUMANITARIAN & MEDICAL AID

UNWLA prioritized both humanitarian and medical aid, delivering critical supplies to hospitals across the country.

By coordinating closely with partners and negotiating lower procurement costs, UNWLA maximized donor support and ensured urgently needed medical aid reached Ukraine quickly and was put to use immediately despite overwhelming wartime demand.

## PARTNER ORGANIZATIONS

Provide ongoing medical and humanitarian aid to hospitals; fulfill large special requests from hospitals (generators, special expensive hospital equipment or unique medical tools).

*Partnership with locally present organizations enable UNWLA to deliver aid to Ukraine swiftly during emergencies without incurring additional expenses for maintaining local infrastructure and staff.*

## HOSPITALS DIRECT BENEFICIARIES

UNWLA directly provides IFAK kits, blood transfusion kits, wound vacs, and external fixators – essential for treating severe injuries.

*Through direct partnerships with equipment manufacturers, UNWLA is able to procure supplies at special pricing, maximizing the impact of donors' contributions. Through direct partnerships with hospitals, UNWLA is also able to fund the procurement of life-saving medical supplies directly at the hospital level, including critical resources such as albumin.*

# OUR FOCUS THIS SUMMER

**JUNE**

**JULY**

**AUGUST**

## MEDICAL AID

BENEFICIARIES:

Targeted fundraising campaign to procure essential supplies for hospitals treating wounded defenders, with a focus on purchasing supplies for wound vac machines and other urgently needed medical materials based on official hospital requests.

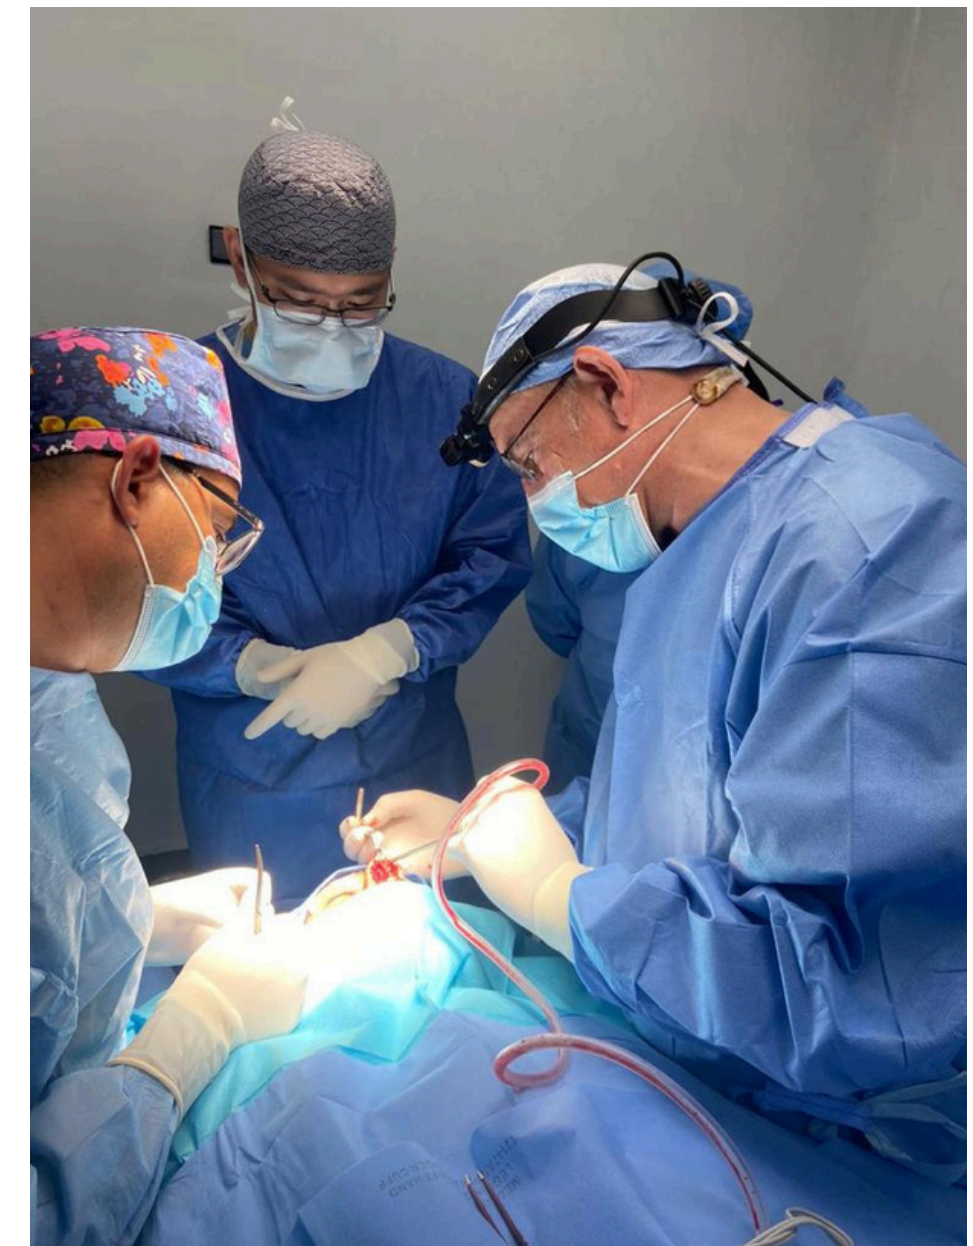

Over the course of 2022 - 2025 UNWLA raised and distributed over \$20,000,000 of medical aid.

Over 60% - to provide Wound Vac machines and individual supplies to the hospitals in Ukraine.

### WHY GENADYNE WOUND VAC MACHINES?

GENADYNE WOUND VAC SYSTEMS ARE CRITICAL LIFE-SAVING MEDICAL DEVICES USED TO TREAT SEVERE TRAUMATIC INJURIES AND COMPLEX WOUNDS SUSTAINED IN WAR.

By applying controlled negative pressure, these systems help accelerate healing, reduce the risk of infection, manage fluid buildup, and stimulate tissue regeneration – significantly improving recovery outcomes for wounded patients.

# WHAT WE ARE SUPPLYING

A typical Genadyne wound vac package generally contains the following core components:

**The NPWT Pump Unit** reusable

Individual use materials - new set is required for each new patient

## CANISTER SYSTEM

for fluid collection to safely manage and capture wound exudate

## DRESSING KITS (FOAM & SEAL)

*Foam Dressings:* Includes sterile, open-cell hydrophobic or PVA foam in various sizes and styles (such as flat, spiral, or bridge foam) depending on the wound shape.

*Silicone Port Pad:* A specialized pad placed over a small cut in the drape to create an airtight seal and connect directly to the vacuum tubing.

*Transparent Film:* An adhesive, transparent drape used to secure the foam and seal the wound airtight so the vacuum can work properly.

## TUBING AND ACCESSORIES

*Vacuum Tubing:* Secure tubing that links the silicone port pad to the collection canister.

*Clamps/Prep Pads:* Often includes a hose clamp to regulate airflow and skin prep pads to ensure a strong drape seal.

PUMP UNIT

CANISTER SYSTEM

DRESSING KITS (FOAM, SEAL AND TUBING)

## WHAT IS OUR GOAL?

**TO SUPPLY HOSPITALS WITH ALL MATERIALS FOR WOUND VAC MACHINES TO HELP UKRAINIAN PEOPLE RECOVER**

One trauma center in one hospital needs approximately 1000 full sets

One hospital houses about 10 trauma centers (number may vary from hospital to hospital)

**TOGETHER WE NEED TO RAISE \$450,000 TO COVER ANNUAL NEEDS OF 4 TRAUMA CENTERS IN HOSPITALS IN DNIPRO, KYIV, VOLYN AND ZHYTOMYR.**

**WOUND VAC  
MACHINES**

**WOUND VAC  
INDIVIDUAL SUPPLIES**

**FASTER AND BETTER  
RECOVERY**

**WOUNDS OF WAR, HANDS OF HOPE**

SUPPORT THE UNWLA'S EMERGENCY MEDICAL  
AID CAMPAIGN.  
HELP US SAVE LIVES IN UKRAINE.
